About This Report

State Mineral Summaries provides information addressing mineral sales volume, revenue collections, revenue disbursements, lease numbers, lease acreage, and cooperative audit program collections and expenditures for Federal and Indian mineral leases in each of the 50 States. The Minerals Management Service (MMS) Royalty Management Program (RMP) distributes the report annually to Congressional, Federal, State, Indian, and industry representatives.

Some information in this report necessarily includes estimated data that may change after publication. Numbers in parentheses may include current year collections, credits, and prior-year adjustments.

Mineral Lease Revenues

The report addresses four types of lease revenues: bonuses, rents, minimum royalties, and royalties.

- **Bonuses.** Leases issued in areas known to contain minerals are awarded through a competitive bidding process. Bonuses represent the cash amount successfully bid to win the rights to a lease.
- **Rents.** A rent schedule is established at the time a lease is issued. Rents are annual payments, normally a fixed dollar amount per acre, required to preserve the rights to a lease.
- **Minimum Royalties.** A Federal lease may further contain a minimum royalty provision. Minimum royalty is the annual payment, on a per-acre basis, required to maintain the rights to a lease until production exceeds a minimum value. Once annual production exceeds the minimum value, minimum royalty payments cease.

Minimum royalties are included under the entry "Other Revenues" in this report. "Other Revenues" include settlement payments, gas storage fees, estimated payments, and recoupments in addition to minimum royalties. The decline in revenue receipts under the entry "Other Revenues" in Fiscal Year (FY) 1995 was due to a lower volume of

settlement payments and to a number of recoupments for estimated royalty payments, particularly recoupments of estimated gas royalties. Estimated royalty payments by many payors exceeded royalty obligations when gas prices fell in 1995.

- **Royalties.** A royalty is due when production begins. Royalty payments represent a stated share or percentage of the value of the mineral produced. The royalty may be an established minimum, a step-scale, or a sliding-scale. A step-scale royalty rate increases by steps as the average production on the lease increases. A sliding-scale royalty rate is based on average production and applies to all production from the lease.

Sales Volume

Sales volume represents the volume of a commodity reported sold during the year. Sales volumes are standardized throughout the report. A list of products and the corresponding unit of measurement is provided on page xi. Sales volume information has not been adjusted to resolve distortions that may be created by communitization agreements, unitization agreements, nonstandard leases and agreements, and prior-period adjustments.

Revenue Collections and Disbursements

Revenues collected from mineral leases on Federal lands are distributed to States, to the U.S. Department of the Treasury (Treasury), and to a number of designated special-purpose accounts administered by Federal agencies. The Bureau of Indian Affairs (BIA) disburses revenues collected from Indian leases to the appropriate Indian Tribes and allottees.

Royalty payments are normally due in the month following sales. Lease payors are required by law to make payment on the last day of the month unless that day falls on a weekend or holiday. Payments are then due on the first business day of the following month.

Since October 1, 1983, MMS has normally disbursed mineral revenues shared with the States in the month following receipt under the provisions of section 104 of the Federal Oil and Gas Royalty Management Act of 1982 (FOGRMA). The MMS deposits Indian revenues in a Federal Reserve bank account, where they are invested and subsequently distributed to Indian Tribes and allottees by BIA. Since revenues collected in one month are disbursed in the following month, collection totals in a given year will not equal disbursement totals for the same year.

The MMS administers leases from a number of different land categories. Legislation and regulations govern formulas for the disbursement of revenues from these leases.

- Public Lands --- Revenues collected from public lands leases are distributed directly to States or paid into either special-purpose accounts or the General Fund of the Treasury.

The Mineral Lands Leasing Act of 1920 provides that States whose boundaries encompass Federal public domain mineral leases will share in the revenues from those leases. States other than Alaska receive 50 percent of all royalties, rents, and bonuses collected from any public lands leases located within their respective boundaries.

Forty percent of remaining mineral revenues is deposited in the Reclamation Fund administered by the Bureau of Reclamation. The Reclamation Fund provides revenues to build, maintain, and operate water and associated power projects on arid and semiarid Western lands. Federal onshore mineral leasing provides about 40-50 percent of Reclamation Fund revenues.

Ten percent of remaining mineral revenues from public lands leases is directed into the General Fund of the Treasury.

Alaska receives 90 percent of all royalties, rents, and bonuses paid for mineral production on public lands leases in Alaska after deduction of payments under the provisions of the Alaska Native Claims Settlement Act of 1971. The State also receives 50 percent of all royalties, rents, and bonuses

generated from the National Petroleum Reserve of Alaska.

- Acquired Lands --- The MMS collects all royalties, rents, and bonuses from leases issued under the 1947 Mineral Leasing Act for acquired lands on behalf of a number of Federal agencies. Revenues are disbursed according to law.

Seventy-five percent of mineral receipts from leases within a national forest administered by the U.S. Department of Agriculture (USDA) is distributed to the General Fund of the Treasury. The remaining 25 percent is distributed to the State in which the mineral resource is produced.

Seventy-five percent of mineral revenues from leases within a national grassland administered by USDA is distributed to the General Fund of the Treasury. The remaining 25 percent is distributed to the county in which the mineral resource is produced.

Seventy-five percent of mineral receipts from lands administered by the U.S. Army Corps of Engineers is distributed to the State in which the mineral resource is produced. The remaining 25 percent is distributed to the General Fund of the Treasury.

Receipts from other acquired lands are deposited in a general Treasury account.

- Military Lands --- Mineral revenues collected from military lands leases issued before 1981 are deposited in the General Fund of the Treasury. Mineral revenues collected for leases issued beginning January 1, 1981, are disbursed in the same manner as revenues from public lands leases.
- Offshore Lands --- Royalty, rent, and bonus revenues from Federal offshore mineral leases on the Outer Continental Shelf (OCS) are distributed to the Land and Water Conservation Fund (LWCF), the National Historic Preservation Fund (NHPF), selected coastal States, and the General Fund of the Treasury.

The LWCF, administered by the National Park Service (NPS), provides revenues for the Federal Government, State governments, and local governments to purchase parks and recreation areas

and to plan, acquire, and develop land and water resources for recreational use. Offshore mineral leasing provides approximately 70-90 percent of LWCF revenues.

The NHPF, administered by NPS, is designed to expand and accelerate historic preservation plans and activities. The NHPF provides revenues for matching grants-in-aid to States and local governments, and funds the National Trust for Historic Preservation. Offshore mineral leasing provides 100 percent of NHPF revenues.

Section 8(g) of the Outer Continental Shelf Lands Act (OCSLA) Amendments of 1978 provided that the States were to receive a "fair and equitable" division of revenues generated from the leasing of lands within 3 miles of the seaward boundary of a coastal State that contains one or more oil and gas pools or fields underlying both the OCS and lands subject to the jurisdiction of the State. The States and the Federal Government, however, could not reach agreement concerning the meaning of the term "fair and equitable." Revenues generated within the 3-mile boundary were placed into an escrow fund beginning in August 1979. Revenues from the Beaufort Sea in Alaska were placed into a second escrow fund under section 7, beginning in December 1979.

Congress resolved the dispute over the meaning of "fair and equitable" in the OCSLA Amendments of 1985, Public Law 99-272. The law provided for the following distribution of section 8(g) revenues to the States:

- Disbursement of escrow funds in FY 1986-87;
- A series of annual settlement payments disbursed to the States over a 15-year period from FY 1987 to FY 2001; and
- Recurring annual disbursements of 27 percent of royalty, rent, and bonus revenues received within each affected State's 8(g) zone.

Congress passed a second law, Public Law 100-202, permitting distribution of \$322.9 million of the section 7 Beaufort Sea escrow funds to Alaska in FY 1988.

Nearly \$75.5 million in OCS revenues was released to seven States in FY 1995.

- Indian Lands --- The BIA collects bonuses and rents from nonproducing leases. The MMS distributes mineral royalties and rents from producing Indian Tribal and allotted leases to BIA, which in turn makes disbursements to the Tribes and to individual Indian allottees, with the following exceptions:
 - Oil and gas payments to four Tribes --- the Jicarilla Apache, the Blackfeet, the Navajo, and the Southern Ute --- are made directly by the lease payor to financial institutions contracted by the Tribes to receive their mineral payments.
 - Certain individual Indian allottees have requested and received permission from BIA for lease payors to make direct payment to the allottees.
 - Payments to the Cook Inlet Region, Inc., in Alaska, on behalf of Alaskan Natives, are made directly by lease payors to the corporation.
 - The Osage Nation manages all mineral leases on its Tribal lands and collects its own revenues.

Producing and Nonproducing Leases

Lease and acreage totals in this report represent both producing and nonproducing mineral leases within State boundaries or offshore areas. The totals include leases for Federal offshore, Federal onshore, and Indian lands.

Cooperative Audit Agreements

The RMP maintained cooperative agreements that provided audit funding in FY 1995 to 7 Indian Tribes and 10 States under the authority provided in sections 202 and 205 of FOGRMA. Cooperative audit agreements under section 202 were in effect at the end of FY 1995 with the following Tribes:

- | | |
|------------------------|--------------------|
| - Blackfeet | - Southern Ute |
| - Jicarilla Apache | - Ute |
| - Navajo Nation | - Ute Mountain Ute |
| - Shoshone and Arapaho | |

Cooperative audit agreements under section 205 were in effect at the end of FY 1995 with the following States:

- | | |
|--------------|----------------|
| - California | - North Dakota |
| - Colorado | - Oklahoma |
| - Louisiana | - Texas |
| - Montana | - Utah |
| - New Mexico | - Wyoming |

The cooperative agreements with the Navajo Nation, California, Colorado, Montana, New Mexico, North Dakota, Utah, and Wyoming include audits of coal, geothermal steam and heated water sources, and solid mineral leases, including phosphate, potassium, and sodium. The agreements with California,

Louisiana, and Texas include the audit of royalties from leases issued under section 8(g) of the OCSLA Amendments of 1985.

The MMS maintained a Memorandum of Understanding (MOU) with Alaska to share audit information in FY 1995. The MOU was not funded.

This report includes revenues collected from cooperative State and Tribal agreement lease audits in FY 1995. The report further includes Federal expenditures to States and Tribes to fund the cooperative agreements during the year. Many lease audits require more than 1 year complete. It is subsequently difficult to draw meaningful comparisons between collections and expenditures for a single year.

Products and Units of Measurement

<u>Product</u>	<u>Unit of Measurement</u>
Amethyst	Grams
Carbon Dioxide	Mcf (thousand cubic feet)
Coal	Short tons (2,000 pounds)
Copper	Pounds or short tons
Garnet Concession	Tickets
Gas	Mcf
Gas Plant Products	Gallons
Geothermal and Heated Water Sources . .	Millions of British Thermal Units (MBTU's)
Helium	Mcf
Nitrogen	Mcf
Oil	Barrels (42 U.S. gallons)
Phosphate	Short tons
Potash	Short tons
Quartz Crystals	Pounds
Sand and Gravel	Cubic yards or short tons
Sodium	Short tons
Sulfur	Long tons (2,240 pounds) or short tons
All Other Solid Minerals	Short tons

NOTE: Sulfur is reported as either a fluid or solid mineral based on the method of extraction. Fluid mineral sulfur is produced by extracting the commodity from the oil and gas stream. All onshore sulfur and a limited amount of offshore sulfur are currently produced from the oil and gas stream. Solid mineral sulfur is extracted using the Frasch solution mining method. The majority of offshore sulfur is produced using the Frasch mining method.

Sodium figures include sodium borate compounds.

Appendix

Inch-Pound/Metric Conversion

Measurements in this report use English (inch-pound) units. Federal and industry organizations are moving towards International System Units, often referred to as metric units. The following table provides factors for converting measurements to inch-pound or metric units. To obtain the metric equivalent, multiply the inch-pound unit by the conversion factor. To obtain the inch-pound equivalent, multiply the metric unit by the conversion factor.

To convert from inch-pound unit	Multiply by	To equal metric unit
acre	0.4047	hectare
barrel (42 U.S. gallons)	0.1589	cubic meter
barrel (42 U.S. gallons)	0.136	metric ton
cubic foot	0.0283	cubic meter
gallon	3.785	liter
mile	1.609	kilometer
ton, long (2,240 U.S. lb.)	1.016	metric ton
ton, short (2,000 U.S. lb.)	0.9072	metric ton
To convert from metric unit	Multiply by	To equal inch-pound unit
cubic meter	6.293	barrel (42 U.S. gallons)
cubic meter	35.33	cubic foot
hectare	2.471	acre
kilometer	0.6215	mile
liter	0.2642	gallon
metric ton	7.33	barrels (42 U.S. gallons)
metric ton	0.9843	long ton (2,240 U.S. lb.)
metric ton	1.1023	short ton (2,000 U.S. lb.)

As the Nation's principal conservation agency, the Department of the Interior has responsibility for most of our nationally owned public lands and natural resources. This includes fostering sound use of our land and water resources; protecting our fish, wildlife, and biological diversity; preserving the environmental and cultural values of our national parks and historical places; and providing for the enjoyment of life through outdoor recreation. The Department assesses our energy and mineral resources and works to ensure that their development is in the best interests of all our people by encouraging stewardship and citizen participation in their care. The Department also has a major responsibility for American Indian reservation communities and for people who live in island territories under U.S. administration.

As a bureau of the Department of the Interior, the Minerals Management Service's (MMS) primary responsibilities are to manage the mineral resources located on the Nation's Outer Continental Shelf (OCS), collect revenue from the Federal OCS and onshore Federal and Indian lands, and distribute those revenues.

Moreover, in working to meet its responsibilities, the **Offshore Minerals Management Program** administers the OCS competitive leasing program and oversees the safe and environmentally sound exploration and production of our Nation's offshore natural gas, oil and other mineral resources. The MMS **Royalty Management Program** meets its responsibilities by ensuring the efficient, timely and accurate collection and disbursement of revenue from mineral leasing and production due to Indian tribes and allottees, States and the U.S. Treasury.

The MMS strives to fulfill its responsibilities through the general guiding principles of: (1) being responsive to the public's concerns and interests by maintaining a dialogue with all potentially affected parties and (2) carrying out its programs with an emphasis on working to enhance the quality of life for all Americans by lending MMS assistance and expertise to economic development and environmental protection.
